powered by  **ALARM.COM®**

Your Doorbell Camera:

The Alarm.com Slim Line makes it easy to deliver front door awareness! The Doorbell Camera features:

- PIR motion sensor
- Digital microphone and speaker
- Record doorbell-triggered clips
- Set motion-triggered automation rules
- Receive real-time alerts

Some of Our Most Requested Quality Add On Products Include:

Wellcam:

Two-way voice and live video calls connect through the Alarm.com app and enable caregivers and family to stay connected to a loved one (whether they are four legged or two) and actually see how they are doing. Activity alerts and highlights provide reassurance when all is well and an additional safety net for detecting trouble.

Wifi Cameras:

Crystal-clear 1080p HD video, infrared night vision and secure cloud recording make the Wi-Fi Video Camera from Alarm.com ideal for in-door video monitoring. With its compact design and flexible mounting options, the cameras are easy to install – whether mounted on a wall or ceiling or simply placed on a shelf.

All of which is manageable by your IQ2 Panel, smart phone and other smart devices!
